Fun Camp Descriptions

Reading Comprehension This camp will focus on the reading comprehension skill from the second grade to fourth grade. Students will learn the following skills: syllables, synonyms, antonyms, palindromes, prefixes and suffixes, classifying, analogies, context clues, following directions, reading for information, sequencing, opinion and fact, main ideas and details.

Critical Writing This camp will focus the reading comprehension skill for the second grade to fourth grade. Students will learn follow skills: proofreading, run-on sentences, combining sentences, nouns and pronouns, topic sentences, story map, writing paragraphs, taking notes, compare and contrast, outlining, writing a summary, library and encyclopedia skills, using reference resources, writing a report, writing a poetry.

Drone This camp will have students have the hands on experience for flying the drone, understand the technology behind it.

Olympic Math Students will challenge themselves with international Olympic math contest problems. Lots of brain teaser problems.

Magician Become a science magician! Discover how physics and chemistry make magic. Experiment with optical illusions and things that glow in the dark. Master cool chemistry tricks; concoct slimy mixtures and potions that change color. Learn how magicians read minds and fool your friends with coin and card tricks.

Space Science Get ready for your Mars mission by studying the solar system, stars, and amazing features of the Red planet. Make solar system model, study the gravity.

Crazy Science Students will learn the earth structure and movement from recent earth quake & tsunami in Japan.

Manners, Manners and Manners Students will learn principles of etiquette and how to treat others and themselves with respect. The focus of this course is: Developing healthy, safe and respectful relationships; Developing respect for ourselves and others; Becoming a considerate and compassionate person; Developing and using proper, respectful communication; Developing and using proper etiquette in shared spaces.

Origami The paper crane has become the most widely known symbol for origami and has motivated many people not only to learn about this beautiful art form, but also to learn how to make origami. This article offers some tips on how anyone can start making origami, and for those who already have some knowledge, how to further your origami skills. Ages : All Ages

Arts & Craft Students will make soap, candle, picture frame and event some edible food art pieces.

Language This camp will focus on student's Chinese/Spanish conversation, practice Chinese/Spanish writing and improve reading skills

Young Chef I This camp is designed for younger students learn how to cook delicious and simple dessert. They will learn math skill by measuring the ingredients and explore their creativity by substituting the ingredients or even creating their own recipe.

Young Chef II This camp will teach students to cook a variety of international foods from salads to desserts, your child will become a culinary artist.

Performance Arts An introduction to drama for the young actors using costumes and props. A varied vocal curriculum taught by professional teachers. Students will learn the techniques designed to create the illusion of physical combat without causing harm.

Future Doctor Explore the medical world. Introduce the difference fields in medical. Role play and possible dissect frog.

Art Camp Explore different drawing techniques using pencils, markers, crayons, sticks, and pastels. Draw faces, a still-life, animals, and landscapes. Your final drawing will be your choice—it's your chance to incorporate as many of the learned drawing methods as possible! *This class is open to anyone interested in drawing!*

Investment Teach the student how to manage their money and how to invest. Class will demonstrate stock market investment, property investment etc.

Jewelry Camp Wear your creativity! Fimo clay, a few tools and some great imaginations are all that will be needed to make fantastic necklaces, bracelets, earrings, and pins. You'll learn several clay techniques, make beads, and use a pasta machine to construct fun "jewelry" for yourself and others.

CSI: Katy Gt Academy has a crime that has been committed and it's up to you to help solve it! Spend the days on learning forensic laboratory skills. Then, spend the days investigating the crime scene. Collect evidence, analyze it, and determine who's responsible!

Computer Game Design Students will learn basic programming skills and create their own computer games. They will learn how to upload their games to the internet so that their friends will be able to get on any computer to play your child's game. Your child will learn how to debug their code. This class will make your kid COOL!!!

CBE : Math 6Pre-AP, Math7Pre-AP, Chinese 1, Chinese 2
This class is designate for the students who are going to take CBE for Math or Chinese. There will be a assessment test before the class.

Other Sport Camps: Fishing Camp, Basketball Camp, and Tennis Camp
